THANK YOU LETTER

Dear our distinguished sponsors,

I would like to take this opportunity to express our sincere thanks for your presence at Security World 2009 Conference & Showcase, which took place on 24-25 Mar 2009 in Hanoi.

Featuring the theme "Secure your organization in an Insecure era", Security World 2009 was successfully ended. This year, the event was recorded with about 14 IT vendors, 26 speakers, more than 400 attendees at the Conference and 1200 visitors at the Exhibition.

Your participation at the event has brought about new actionable and thought-provoking ideas, and market leading security technology, which are of high value for our attendees from both governmental and private sectors in implementing reliable security systems.

During the busy days, we do hope for your sympathies if there were some unavoidable mistakes that could reach your confusions and misunderstanding.

Your feedbacks and comments are highly appreciated which should make our next year event more relevant and insightful.

Once again, thank you for your support and thoughtfulness. We look forward to welcoming you again at Security World 2010.

Yours sincerely,

A handwritten signature in black ink, appearing to read "Le Thanh Tam".

Conference & Showcase

24 - 25/ 03/ 2009, 1st Floor, Hanoi Daewoo Hotel

Conference & Showcase

SECURITY WORLD 2009

**24-25
March
2009**

Daewoo Hotel Hanoi

PRESS RELEASE

SECURITY WORLD 2009

CONFERENCE & SHOWCASE

24-25 March 2009, Hanoi Daewoo Hotel

Hanoi, 24th March 2009, **the 4th Security World 2009 Conference and Show case** will be held on 24-25 March, 2009 in Hanoi and co-organized by General Department of Technology - Ministry of Public Security (MoPS), Vietnam Computer Emergency Response (VNCERT) – Ministry of Information and Communications (MIC) and International Data Group (IDG Vietnam).

“SECURE YOUR ORGANIZATION IN AN INSECURE ERA”

Featuring this theme, Security World 2009 will mention the hottest issues of information security in economic downturn era. In a volatile economy, enterprises are facing higher security threats, from cyber crime attacks to theft of valuable corporate information. The vital question for organizations is how to establish an effective information security strategy which ensures business continuity within tightened budgets.

According to McAfee (2009) companies worldwide lost about \$1 trillion due to intellectual property theft and Information System damages. Three main reasons for data leakage and system breach are: cost cutting caused by neglect of security system; growing attacks of hi-tech criminals and corporate insiders. McAfee forecasts that the tightening economic context will accelerate data theft incidents.

INFORMATION SECURITY FACTS IN VIETNAM

The Cyber world has gradually become a virtual society, implying lots of security risks. According to Department of IT, General Department of Technology, MoPS (E15), numerous security vulnerabilities exist in Vietnam, nearly 60 millions computers have been infected by virus. There were 416 website hacking incidents while international hackers accounted for 251 incidents. Bkis research released that virus strain soared 5 times higher against 2007, several tens websites have been attacked each month. 40 cases related to hi-tech crimes which incurred loss of 30 thousands million VND (10 times in comparison to damage in 2007).

Mr. Nguyen Tu Quang, Director of Bkis commented that: *“After two silent years, IT crimes have come back, there have been instances of attacks such as P.A Vietnam company domain theft, Techcombank website hacking, DDos attack,...Last year, the outbreak of virus was regarded as a remarkable concern in Vietnam as malicious code booms on daily basis. Apart from the proliferation of viruses, the applied technology for virus production and malware distribution has been growing rampantly. Virus coders have been engaging increasingly in fraud and black-money making.”*

This situation stems from insufficient awareness of information security and ineffective investment and implementation of security strategies. An information security in enterprises survey (based on international standards) was conducted by VNCERT. It showed that 40% of respondents have no firewall, 70% did not set up any security disaster recovery system, and 85% of enterprises were without an information security strategy.

SECURITY WORLD 2009 CONFERENCE AND SHOWCASE

"Security World is an annual event co-organized by Ministry of Public Security and partners which aims to seek solutions and technology for public security demand and national requirement in security fields such as: networking security, data protection, surveillance system, hi-tech crime prevention...The event has become a prestigious and high profile forum for IT experts, CEOs, CIOs of governmental institutes and enterprises."- Mr. **Dang Van Hieu**, Vice Minister of Public Security.

The event comes up with critical issues in **National Information Security Strategy** and **Technology Platform for Public Security** as follows:

- Vietnam National Information Security Strategy: laws and regulations, standards and politics, data encryption standard, cooperation of national information security authority.
- The role of technology platform in national security, citizen management and public services.
- Implement and development of PKI, CA, Encryption and Open Source as well as National Data and Critical Information Infrastructure.
- Fact and orientation of PKI, CA in Vietnam: Public CA service, Digital Signature in mobile devices and appliances, PKI Infrastructure.
- Security for e-Transactions, **secure** .VN Domain name and DNS and security solution for wireless network (w i/ w imax)

"**National Information Strategy Plan**" conducted by Strategy Institute and VNCERT, MIC would be officially released in conference of Security World 2009 through presentation of Mr Vu Quoc Khanh, Director VNCERT . Mr. **Vic Mankotia**, *Vice President, Sales and Engineering, Asia Pacific and Japan, Symantec Corporation* will give professional advice for national information security infrastructure by introducing solutions for "**Protecting the Critical Information Infrastructure**".

Adapting "**National Information Security Strategy**" session, a presentation of **Ms. Elaine Lee** - *Senior Financial Analyst IDC Malaysia* will deliver assessment, analyses and forecast the trends in security investments in APAC in sinking economy. In 2009 IDC believes security spending will slow down at varying rates in different markets, as affected by the economic environment, yet spending on Information Security will remain stronger than other IT areas because of compliance and business requirements.

Security World 2009 will be held in the context of IT budget cuts included security spending due to the pressure of an economic downturn. Hence, the event will focus on awareness improvement, practices exchange and solutions introduction aim to establish effective security strategy for IT and telecommunication system of institutes and enterprises in turmoil economy.

Mr. **Tran Nguyen Vu**, *Deputy Director, Department of Financial Informatics and Statistics, Ministry of Finance* considers "*The information security strategy is not merely network security infrastructure. It also encompasses security policies, compliance controls as well as solutions at both physical and network levels*". Session "**Information Security Strategy for Enterprises and Organizations**" hosted by Ministry of Finance will dig into issues: Information Security Policies, Information Security Management System (ISMS), Risk Evaluation and Classification, products and solutions for Risk Evaluation and Management. The session is organized specifically for CIOs, CSOs and information security executives in organizations and enterprises. Mr. **Wong Kang Yeong**, *SonicWALL* will share "**10 Strategies to Optimize IT Spending in an Economic Downturn**"

Conference & Showcase

SECURITY WORLD 2009

24-25
March
2009

Daewoo Hotel Hanoi

Economic recession has become foundation for new attacks which target cyber network, data of enterprises in financial, banking and online payment for illicit money earning. Besides, emerging hi-tech crime in Vietnam will continue their assault on information system of government. These issues will be digged in “**Network Security and Data Protection**” by assessment, analyses and sharing solutions, practices of Ministry of Finance, Ministry of Public Security, State Bank of Vietnam, commercial banks: Techcombank, Vietinbank...and leading providers such as: Symantec, CE-Infosys, Bkis, PineApp, Proxima.

According to Ministry of Public Security, in the first quarter of 2009, 42 websites have been attacked via security vulnerabilities. Among them, there were many websites register .gov.vn, edu.vn domain. Therefore, taking place in second day, the session will concentrate on two growing concerns in Vietnam: **.VN domain name and DNS Security** and **Security for Wireless Network (Wifi-Wimax)**.

Being a current concern as well as controversial issue in Vietnam, “**Authentication and Digital Certification**” plays a key role in electronic commerce. However, the recent upsurge of financial fraud has brought a new set of challenges to authentication systems which is at the most fragile phase. The Law of Electronic Transaction and related guiding statutes of authentication and digital certification (ADC) have been released. Especially the Ministry of Information and Communication prescribed 6 compulsory criteria for authentication and digital signature. Those are initial steps for electronic trade implementation in Vietnam. The presence of the National Centre for Digital Signature Certification, Ministry of Information and Communications, experts from Vietnam Government Information Security Commission, Ministry of Home Affairs, State Bank of Vietnam and solutions, products providers: Netrus, Nacencomm, VDC, Digicom, underlines the importance of ADC in the symposium at Security World 2009.

Together with the main conference, Security World 2009 also showcases the latest software systems, tools, equipment and solutions on **Anti-Virus/Spam/Spyware, Data Management and Storage, Security Compliance Control, Web Security Appliances, Surveillance and Identity Management ...Vendors and exhibitors will be** from noted international vendors: **Symantec, IBM, CE Infosys, Checkpoint (Misoft), Nokia (M.Tech), Tumbleweed, PineApp, Secure Metric, Amigo, Bkav Pro** and **AVP**.

Why should you sponsor

Security World 2009, Hanoi delivers leading-edge insights, compelling presentations and extensive opportunities to exchange ideas on how to develop effective security strategies and enhance business continuity. The event offers leading IT corporations opportunities to engage with security professionals at all level who are actively learning and evaluating the best security solutions and products that are available on the market.

Security World 2009, Hanoi will draw the interest of about 1000 conference attendees and 1500 exhibition visitors including corporate top executives, key governmental representatives, ICT managers and technological professionals as well as those interested in comprehensive and effective security solutions for stable business growth

We guarantee that your marketing strategy at **Security World 2009, Hanoi** will bring you:

- Exclusive access to qualified decisions makers who are in charge of implementing and purchasing security technologies
- Unparalleled relationship building opportunities with your prospects
- Faster market penetration through exposure of your products and solutions
- Comprehensive marketing and extensive PR efforts – take advantages of our emailing lists and databases and work with our media partners
- Brand awareness & customers' loyalty

Security World 2009, Hanoi's Sponsorships will help positioning your company as a key player in Vietnam's security industry as well as among ICT community.

We are pleased to listen to your requirements and goals at the event. With our diversified sponsorships and marketing & promotional opportunities, we will work with you to create a best presence for your company at **Security World 2009, Hanoi** that can meet your goals and budget.

Take action now and see how you will stand out during the show!

Tổng quan về An ninh mạng & Bảo mật Dữ liệu tại Việt Nam

Ts. Nguyễn Việt Thế, Cục trưởng, Cục Công nghệ Tin học Nghiệp vụ, Tổng cục kỹ thuật, Bộ Công an

Các dịch vụ và ứng dụng web ngày một phát triển đã giải quyết được nhiều bài toán chi phí cho các doanh nghiệp trong

bối cảnh suy thoái kinh tế. Tuy nhiên, đi kèm với sự phát triển đó là những mối đe dọa bảo mật ngày một tăng trên nền tảng web. TS. Nguyễn Việt Thế sẽ trình bày các xu hướng phát triển an ninh mạng và bảo mật dữ liệu tại Việt Nam.

Giải pháp Bảo mật cho các thiết bị di động

Ông Georg Krause, Nhà Sáng lập và Giám đốc điều hành, CE-Infosys

Công nghệ bảo mật đặc biệt phát triển giao thức truyền tải giọng nói qua mạng internet (VoIP) mang lại tính bảo mật tuyệt

đối với chất lượng truyền tải âm thanh hoàn hảo. Giải pháp sử dụng môi trường mạng với chi phí liên lạc thấp, trước đây chỉ dành phục vụ các tổ chức quân đội và chính phủ, là một lựa chọn thiết thực cho các doanh nghiệp hiện nay.

Xây dựng hệ thống an ninh mạng cho các doanh nghiệp

Ông Nguyễn Tử Quảng, Giám đốc BKIS

Để đảm bảo an ninh mạng cho doanh nghiệp, những người chịu trách nhiệm quản lý hệ thống mạng, ngay từ khi

xây dựng hệ thống đã phải dành một phần quan trọng cho thiết kế đảm bảo an ninh mạng cả về hạ tầng (phần cứng) và ứng dụng (phần mềm). Trong quá trình vận hành, việc cập nhật những bản vá và rà soát phát hiện các lỗ hổng trong hệ thống phải trở thành công việc thường xuyên.

XÂY DỰNG CHIẾN LƯỢC AN TOÀN THÔNG TIN HIỆU QUẢ ...?

Quản trị rủi ro: Kinh nghiệm từ Bộ Tài chính

Ông Trần Nguyễn Vũ, Phó Cục Trưởng, Cục Tin học và Thống kê Tài chính, Bộ Tài chính

Đề án An toàn bảo mật hệ thống thông tin tài chính đang được triển khai trong giai đoạn 2, tập trung xây dựng chính sách về an ninh thông tin và xây dựng hệ thống quản lý an ninh thông tin (ISMS) theo chuẩn ISO 27001/27002. Ngành Tài chính đang chú trọng tới an toàn thông tin từ mức chính sách, kiểm soát tính tuân thủ cho đến các giải pháp an toàn bảo mật ở mức vật lý và mức mạng.

Bảo mật thông tin dữ liệu khách hàng

Ông Nguyễn Văn Văn, Trưởng phòng An ninh thông tin, Trung tâm công nghệ, Techcombank

Để chiếm lĩnh ưu thế trên thị trường và thu hút khách hàng, các ngân hàng phải chạy đua trong việc cung cấp các sản phẩm, dịch vụ phong phú, đa dạng và tiện ích tới khách hàng. Thông tin khách hàng là tài sản mang tính sống còn của mỗi ngân hàng, việc bảo vệ "tài sản" này có ý nghĩa rất quan trọng. Tham luận sẽ tập trung đánh giá rủi ro về an toàn thông tin đồng thời đưa ra các giải pháp khắc phục dựa trên thực tế triển khai tại Techcombank.

Những giải pháp bảo mật cho mạng máy tính không dây (Wifi - Wimax)

Ông Hoàng Lê Minh, Viện trưởng Viện Công nghệ phần mềm và nội dung số Việt Nam Bộ thông tin và truyền thông

Bài trình bày sẽ đề cập giải pháp bảo mật bằng công nghệ IPN mã hóa bằng key, sử dụng một lần cho dữ liệu

RÒ RỈ THÔNG TIN KINH DOANH QUAN TRỌNG ...?

Bảo mật và quản lý thông tin hiệu quả

Ông Vic Mankotia, Phó chủ tịch, phụ trách Kinh doanh và Kỹ thuật, Nhóm giải pháp và đối tác chiến lược cho thị trường mới nổi, Symantec Châu Á TBD và Nhật Bản

Bảo mật và quản lý thông tin ngày càng là một thách thức lớn. Trung bình, cứ hai năm thì khối lượng thông tin cần được bảo vệ tại một doanh nghiệp quy mô vừa và lớn lại tăng lên gấp đôi. Tại Security World 2009, Symantec sẽ giới thiệu các giải pháp bảo mật, lưu trữ và quản lý hệ thống đa dạng giúp các doanh nghiệp bảo vệ và quản lý các thông tin mang tính sống còn cho hoạt động kinh doanh

Bảo mật dữ liệu – Kinh nghiệm triển khai tại Vietinbank

Ông Nguyễn Anh Tuấn, Trưởng phòng Kế hoạch, nghiên cứu và phát triển, Trung tâm CNTT, Vietinbank

Sự phát triển nhanh chóng của các ứng dụng web và kiến trúc hướng dịch vụ (SOA), xu hướng chia sẻ thông tin với các đối tác, khách hàng và làm việc từ xa khiến cho hệ thống ngày càng mở. Các ứng dụng phát triển nhanh và liên kết ngày càng lỏng lẻo không có đủ khả năng kiểm soát truy cập khiến cho việc bảo mật cơ sở dữ liệu trở nên khó khăn hơn bao giờ hết.

Giải pháp xây dựng Trung tâm Dữ liệu hiệu quả

Ông Francois Tran, Giám đốc Điều hành, Vi-Networks, Inc.

ViNetworks mang đến Trung tâm Dữ liệu giúp tăng cường hiệu quả hoạt động kinh doanh cho các tổ chức tài chính và ngân hàng. Với giải pháp phù hợp với hạ tầng mạng của Việt Nam, ViNetworks hướng tới xây dựng quy trình quản lý dữ liệu an toàn với độ tin cậy tối ưu cho các doanh nghiệp.

GIẢI PHÁP ĐẦU TƯ HIỆU QUẢ ...?

Xây dựng chiến lược ATTT hiệu quả trong thời kỳ khủng hoảng

Bà Elaine Lee, Chuyên gia phân tích cao cấp, International Data Corporation-IDC

Theo số liệu thống kê, 70% tổng ngân sách CNTT được sử dụng cho các đầu tư về hạ tầng và chi phí vận hành. Thực tế trên đặt ra áp lực giảm chi phí quản lý và vận hành CNTT tại các doanh nghiệp. Tuy nhiên, làm thế nào để cắt giảm chi phí khi nhu cầu về an toàn bảo mật cho hệ thống CNTT ngày một cao? Làm sao đạt được hiệu quả đầu tư tối ưu?
