Founded in 1999 by Mr. Sevaraja Velautham a pioneer in the Malaysian IT Security arena, AVP (SEA) is a regional based ICT Distribution and Solutions Provider offering a diverse range of world class technology platforms.

Our aim is to deliver highly reliable yet affordable Enterprise Class Infrastructure (Unified Communications, Intranet Services, Network), Business Applications (Document Management, Office Productivity, Helpdesk, CRM) and Security (Endpoint and Gateway Protection, Anti Spam, Data Leakage Prevention) Centric Products and Services that any business regardless of size and type can leverage upon to attain new levels of productivity and growth.

No solution is complete without the right services, with our highly skilled team of Consultants, Engineers and Trainers, we offer customers and business partners the means to leverage on our strengths which include infrastructure, application plus network security maintenance via various mechanisms remote, electronic (helpdesk, email, phone) and on-site best practices, reporting, auditing, quality assurance and full specialized training for all represented products.

With end to end technology expertise and dedication of our team, AVP (SEA)'s product and solutions offering are used in various Government agencies, Financial Institutions, Universities and large private sector organizations including a Government Ministry using over 300,000 Kaspersky Anti Virus licenses. AVP (SEA) was also recipient of Technology Business Review Magazine ASEAN Awards winner for "Best Security Application Provider".

In line with our "Making IT Affordable" business strategy, we constantly seek out and evaluate emerging and existing technologies that offer our customers a long-term and sustainable plan for building cutting edge infrastructures that primarily focus on security, collaboration and ease of management.
